

DAVIDSONS ELECTRICAL

2023 Brochure

**PROVIDING EXCEPTIONAL, RELIABLE &
COMPREHENSIVE ELECTRICAL SERVICES**

SERVICE COMMITMENT

Our service commitment is based on...

- ▶ Experience
- ▶ Transparency
- ▶ Reliability
- ▶ Communication

EXPERIENCE

Davidsons Electrical and Data is an experienced and reliable electrical company, that prides itself on providing first-class customer service, built around realistic time frames and quality work. We have been specializing in commercial maintenance, residential building and level 2 electrical works Sydney wide for over 5 years.

Our extensive range of experience means we fully understand electrical installations from Ausgrid network on the street to the light fitting that turns on when you flick a switch. It is this in depth understanding that allows us to provide unparalleled service in the industry.

As level 2 electricians, our team understand the ins and outs of switchboards, are able to complete metering requests and access components on switchboards that are restricted to regular certificate 3 electricians. This means we are a one stop provider for all your electrical needs.

TRANSPARENCY

Our transparent approach is underpinned by our customer service focus. It all starts from the initial contact and continues through to after the job is fully completed, to ensure you are totally satisfied with all aspects of our work.

We provide clear quotes up front and keep our clients regularly updated to ensure they have a full understanding of the financials and the timelines throughout the duration of the project.

RELIABILITY

Our team is dedicated to ensuring your safety by delivering electrical work and energy advice that is of the highest level and compliant with Australian standards. Our team undergoes annual stringent safety audits.

We treat all our jobs with urgency and professionalism which means all our services are reliable and consistent, 24/7.

For example, one of our long-term existing clients is in the aged care space and we understand how delicate and urgent some of their jobs may be. Also, our team serviced them consistently and reliably throughout the strict COVID 19 protocols that were placed on them.

COMMUNICATION

We believe that communication is our greatest asset. With clear lines of communication between our team, contractors, and customers, we are able to provide the most efficient solutions and complete tasks without compromising on standards from both regulation and customer expectations.

We are proactive and flexible in the way we work and we always strive to work within our client schedules. What's more, you will always be kept up to date as to the status of your job.

OUR SERVICES

Our team of highly experienced electricians provide a comprehensive range of services including Level 2 work.

As ASP Level 2 electricians, we are certified and have been given permission by NSW Government Trade & Investment Resources to safely work on electricity networks owned by Ausgrid and Endeavour Energy.

Our services include:

General	Level 2
24-hour emergency services	Installation of overhead service lines
Loss of power	Installation of underground service lines
Tripping circuits	Point of attachment bracket repairs
Hot water services	Assess electricity metering and segregation of residential dwellings
Home automation system servicing	Conduct electricity audits
Thermal Imaging and RCD testing	Relocation of new switchboards
Defect rectification works	Consumers mains rewiring
Metering	Earthing installation and testing

ENVIRONMENT

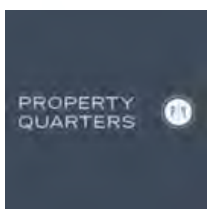

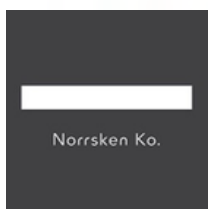

Our goal is to minimise, if not eliminate, the impact of our work on the environment, so all aspects of waste control as well as recycling are considered in our job planning. We are committed to protecting our planet.

QUALITY ASSURANCE

All large projects have a site-specific quality plan prepared prior to commencing. This plan is developed after all aspects of the scope of works, project risks, works methodology and environmental impact are assessed during our project pre-commencement planning process. Project check lists are used to assess and maintain quality during the process.

OUR PARTNERS

We work to develop long term relationships with our partners, which include:

CLIENT REVIEWS

"Davidsons recently completed a full light switch and powerpoint replacement in our house and installed a security camera system. Their communication about time frames, costs and options was clear and they were punctual and pleasant to have in our busy, home schooling and dog filled house. They happily juggled the needs of everyone still needing internet access and power throughout the process. Such a good experience"

Prue G.

"Davidsons Electrical rewired our entire terrace, upgraded and moved our power box and helped co-ordinate street upgrade with Ausgrid. Couldn't be more happy with the experience - all the employees we dealt with were friendly, professional, responsive and on time. Would highly recommend, and would use again in a heartbeat"

Peter M.

"Thanks Brendan for the work you did rewiring and adding "smart" technology to my house. I will definitely use Davidson's Electrical and Brendan again. Highly recommend - they provide a professional, timely and quality service!

Thanks again!"

Jake E.
